

Small Group Facilitation Guide

SMALL GROUP FACILITATION GUIDE

How to lead engaging, healthy DNA Pods.

1. Create a Safe Space

- Begin every new season by establishing ground rules.
- Remind the group that it's okay to have doubts or disagree.

2. Managing Group Dynamics

- The Dominant Talker: Gently interrupt with validation, then redirect.
- The Quiet Member: Don't force them to speak, but offer soft invitations.
- The Tangent: Validate and park it.

3. Asking Better Questions

- Avoid Yes/No questions.
- Avoid questions with one obvious answer.
- Use open-ended questions.

4. The Role of the Facilitator

- You are a guide, not a teacher or a guru. You don't need all the answers.
- Embrace silence.

5. Handling Conflict

- If a theological disagreement arises, ground the conversation in love.
